DAYROBIN · TEST V0.2.26

Tester guide

Step by step: install, save, tester mode, feedback with a screenshot, e-mail replies and retesting. Keep this page open on your laptop while you try the app on your phone.

This guide online: **dayrobin.avl-app.workers.dev/guide/**

What is DayRobin?

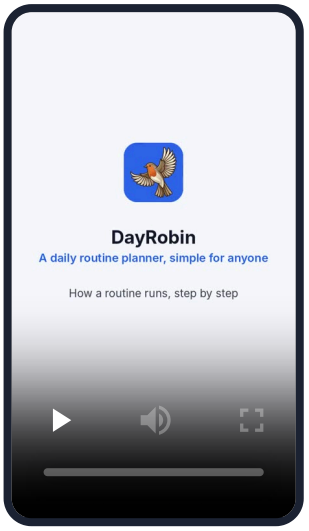

DayRobin is a free daily routine planner for helpers and the people they support: parents, carers, teachers and anyone who wants a day that is easy to follow.

1. The **helper** types the day, one step per line: `07:10-07:20 Brush teeth`.
2. The app gives every step a picture and a friendly sentence. Your own photo and your own voice work too.
3. The **user** follows it one step at a time: a big picture, a time bar, a spoken sentence, praise at the end.

22 languages **no account**

works offline once installed

a routine planner, not a medical device or therapy

Demo, 2 min 24 s

WHY WE ASK YOU TO TEST

We want to find what breaks or confuses on real phones in real homes, before families use it. 3-4 weeks, about 15 minutes at a time. It's a favour, not a job: DayRobin has no income yet, so there is no pay. Give as much time as you like; every note helps it come to life.

In the video the clock runs fast and a machine voice speaks; on your phone you hear the phone's own voice or your recording. The video also shows AI drawing a new picture (for brushing teeth): that is not in this test version yet.

Watch the videos in the online guide: dayrobin.avl-app.workers.dev/guide/#about

Open it on your phone

Scan the QR code with the phone's camera, or type the address in the browser (Chrome on Android, Safari on iPhone).

`https://dayrobin.avl-app.workers.dev`

You need: a phone (Android or iPhone) a mail app set up on it

about 15 minutes at a time

Before you start: explore on your own

Your first impression is the most valuable note we can get, and you only have it once. Install the app (part 1 helps if needed), then put this guide aside and look around in it for 10-15 minutes.

- What did you try first?
- What was easy to find, and what did you look for in vain?
- Where did you get stuck, and what felt odd or confusing?

Send it as a short note (as in part 6), starting with "First impressions", for example. Then come back here and go on step by step.

0 Start here: What is DayRobin? (with video)

0 Then: explore on your own

1 Install

2 The two modes and the lock

3 Tester mode on and off

4 Backup (with pictures and recordings)

5 Screenshot and mark the problem

6 Send feedback with the picture

7 E-mail replies

8 After a fix: retest and reply

9 Uninstall and a clean start

10 Test cases: every feature

11 Known limits

12 Privacy and good habits

1

Install

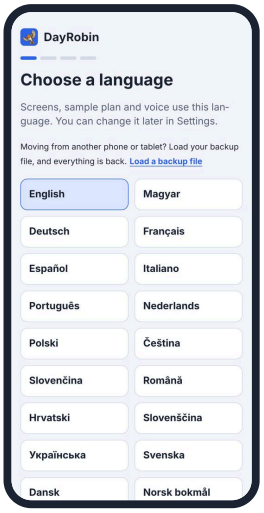

1. Open the address on your phone (QR code above).

2. Tap **English** (or your language).

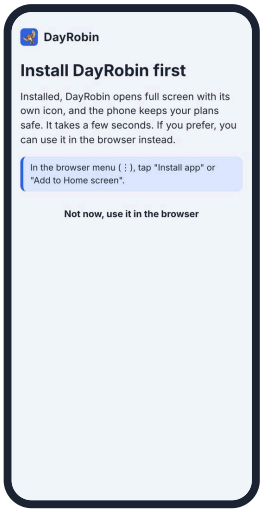

3. DayRobin first offers to install itself. **Android:** **Install DayRobin**, wait a few seconds while it installs, then **Open DayRobin**, or open it with the robin icon; do the rest in the app. If you see steps instead of the button: the browser menu (⋮) > **Install app**. **iPhone (Safari):** Share button > **Add to Home Screen**, then open the icon.

   Don't want to install? **Not now, use it in the browser**. You can install later from the browser menu.

4. Tick **I accept the terms**, then **Continue**.

First screen

Install first

5. First name: optional. A nickname is fine for the test. PIN: 4 digits, or **Skip**. Remember your PIN!

6. The **helper area** opens with the example day.

7. From now on, open it with the robin **DayRobin icon**. The old browser tab goes quiet when the app opens: you can close it.

IPHONE TIP

Install first, then write the plan. A plan made in Safari may not show in the Home Screen app (we have not checked this yet: tell us what you see).

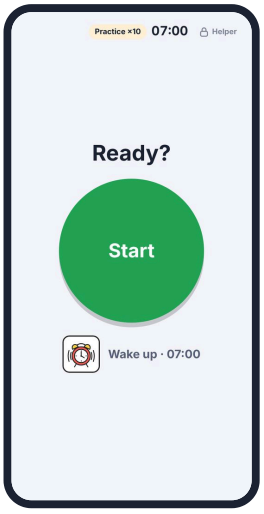

2

The two modes and the lock

1. **Helper area** (you): write the day, check pictures and voices, open Settings (☰ button, top right).

2. **Routine screen** (the user): **Start routine**. To try it: **Practice now** or **Fast practice (10× speed)**.

3. Back to the helper area: **press and hold the lock** at the top right for 2 seconds, then type the PIN (without a PIN it asks a simple sum).

Lock at the top right

PIN or a sum

3

Tester mode on and off

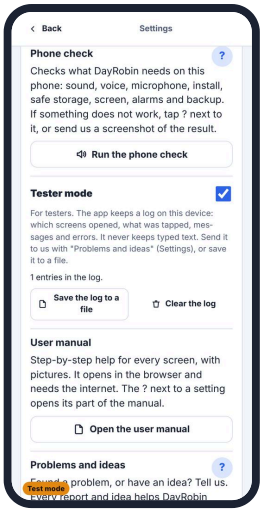

In tester mode the app keeps a log on the phone: which screens opened, what you tapped, which errors came. It never logs the text you type. Nor your PIN: keypad taps appear only as "keypad

tap". The log leaves the phone only when you add it to a report.

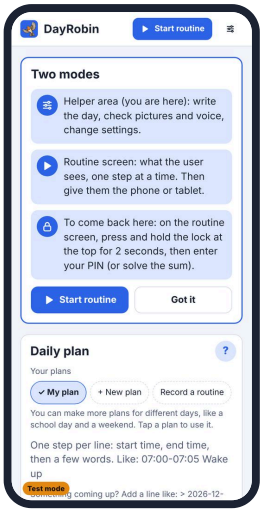

1. **Turn on:** helper area > ☰ (Settings) > scroll down to **Tester mode** > switch it on.

2. An orange **Test mode** label shows at the bottom left of the helper area. The routine screen does not show it.

3. **Turn off:** the same switch. **Clear the log** empties it. **Save the log to a file** saves it as a file.

The switch

Label at the bottom left

4

Backup (with pictures and recordings)

The backup is one file with everything: settings, plans, pictures and recordings. It does not hold the tester log. Photos go in at the small size the app keeps them. On a new phone, turn **Alarms**

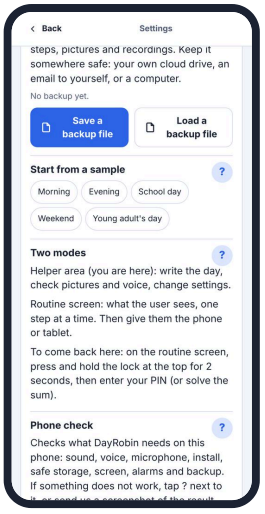

when the app is closed on again.

1. **Save:** ☰ (Settings) > **Backup** > **Save a backup file**. A password is optional (the app does not keep it).

2. The phone asks where to save: choose Drive, Files or Downloads. The file is called `dayrobin-backup-date.json`. Settings then shows **Last backup**.

3. **Load:** Settings > **Load a backup file** > pick the file > confirm. It replaces everything on the phone.

4. **On a new phone:** the very first screen has it: **Load a backup file** (the "Moving from another phone or tablet?" line).

Save and load

HOW TO TEST IT

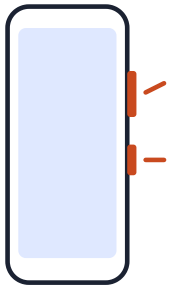

Save, change something (for example delete a step), then load the backup: the old state should come back. If you have a second phone or tablet, load it there too.

5

Screenshot and mark the problem

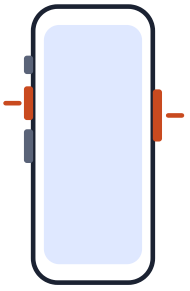

A picture says more: take a screenshot and circle the problem on it. The exact buttons can differ a little between phones.

ANDROID

Power + Volume down together, quickly. If that does not work: hold Power, then tap **Screenshot**.

IPHONE

Side button + Volume up together, quickly. iPhone with a Home button: **Side (or top) button + Home**.

1. A small preview shows in the corner. Tap it.
2. Pick the pen: on iPhone **Markup**, on Android the pencil or **Edit**.
3. Draw a circle round the problem, and add a word or two if you like. Then **Done** / **Save**.
4. Missed the preview? Photos / Gallery > Screenshots > **Edit**.

A real bug, marked like this

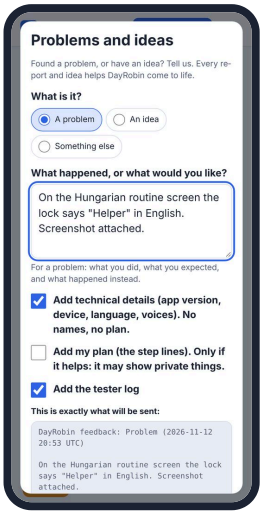

BEFORE YOU SEND IT

Look at the picture: does it show a name, a notification, another app? Crop them out (in the editor: Crop).

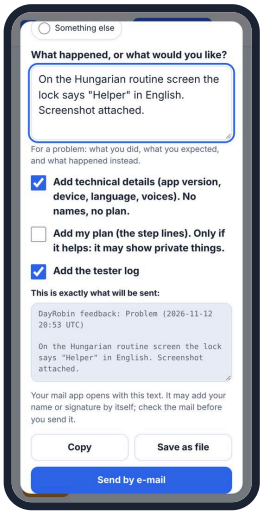

6

Send feedback with the picture

1. At the very bottom of the helper area: **Report a problem or an idea**. (Or: ☰ > **Problems and ideas**.)
2. Choose **A problem**, **An idea** or **Something else**.
3. Write what you did, what you expected, and what happened instead.
4. Ticks: keep **technical details** on. Keep **Add the tester log** on. **Add my plan** only if it helps.

The form

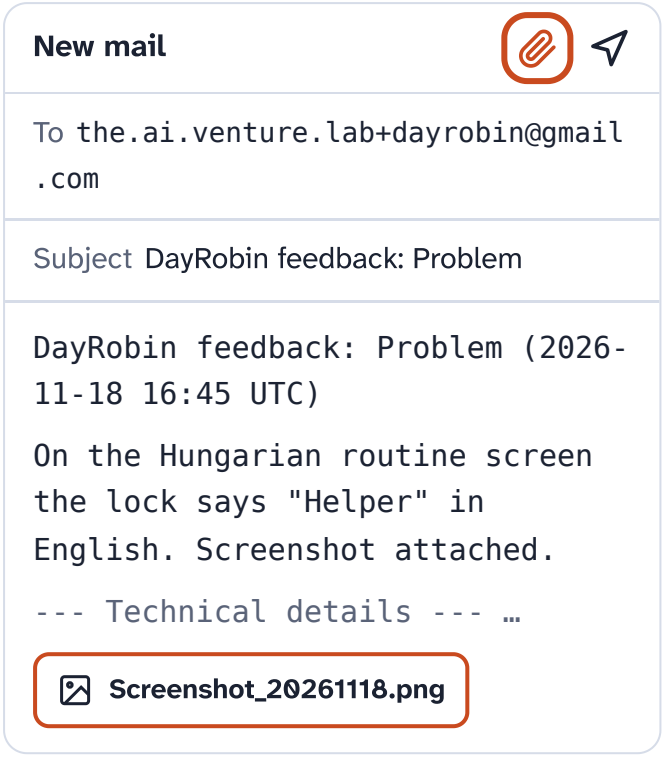

Preview, send

5. Check **This is exactly what will be sent**. Then **Send by e-mail**: your mail app opens with the text.

6. **Attach the picture:** in the mail app tap the paperclip and choose the screenshot (see the sample below).

7. If the mail app adds a signature or a phone number at the bottom, delete it. Send.

1. The address and the text are already filled in. Don't change the address.
2. Paperclip (Gmail: at the top; iPhone Mail: tap in the text, then the photo icon above the keyboard).
3. Choose the marked screenshot. More than one picture is fine.
4. Send.

NO MAIL APP OPENS?

In the form tap **Copy**, then write a mail to this address and paste it in. Or **Save as file** and attach the file.

7

E-mail replies

You get two mails from us. DayRobin's AI assistant writes both, and both carry the ticket number (like `DR-20261118-k3w9q2mz7xpa`). Quote that number when you write about the same thing

again.

1. Receipt: it arrived

From **AI Venture Lab**

Subject DayRobin feedback received (ticket DR-20261118-k3w9q2mz7xpa)

Hello, thank you for your feedback about DayRobin. We have logged it as ticket DR-20261118-k3w9q2mz7xpa. If you write again about the same thing, please quote this ticket id. We read every message; we cannot promise a change or a date. This reply was written by an AI assistant of AI Venture Lab.
…

When: usually the same day.

2. Fixed: ready to try

From **AI Venture Lab**

Subject DayRobin update for ticket DR-20261118-k3w9q2mz7xpa

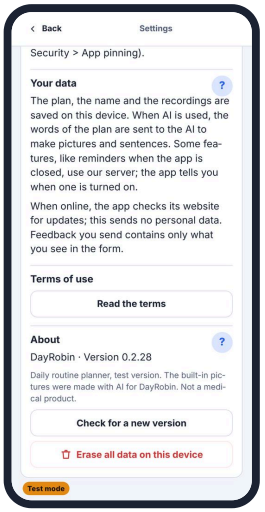

Hello, the change you asked about in ticket DR-20261118-k3w9q2mz7xpa is now live in the newest DayRobin. Please try it and tell us if it works for you; quote the ticket id. AI assistant of AI Venture Lab.

When: once the fix is live. No promised date.

8

After a fix: retest and reply

1. **Update:** ☰ > **About** > **Check for a new version**. If it says **A new version of DayRobin is ready**, tap **Restart now**. Your plans stay.
2. Check the version number in About (like **Version 0.2.18**).
3. Do the same steps as in your report.
4. **Reply** to the "DayRobin update" mail (keep the ticket number in the subject): **"Works"** or **"Still wrong"**, and what you saw. If it is still wrong, add a new screenshot.

About: version, update

5 Or send a new report from the app and write the ticket number in the text.

1
YOU
Report from the app, with a picture.

2
DAYROBIN
Receipt with a ticket number.

3
DAYROBIN
We decide on it, fix it and test it.

4
DAYROBIN
"Update" mail when it is live.

5
YOU
You update and try again.

6
YOU
Reply: "Works" (closed) or "Still wrong" (back to 3).

9

Uninstall and a clean start

FIRST
To keep your plans, save a backup first (part 4).

1 **Erase the data in the app:** ☰ > **About** > **Erase all data on this device** > **Erase**. This deletes plans, recordings and settings.

2 **Remove the icon.** Android: hold the DayRobin icon > **Uninstall** (or App info > Uninstall). iPhone: hold the icon > **Remove App** > delete. Menu names can differ between phones.

3 **Install again:** open the address again. The first screen should come, empty. Loading your backup brings everything back.

ANDROID
App info
Uninstall

IPHONE
Edit Home Screen
Remove App

Why step 1? On Android the data can stay in Chrome after the icon is removed. If something stayed: in Chrome, the icon at the left of the address bar > Cookies and site data > Delete.

10

Test cases: every feature

If you haven't yet, start by exploring on your own. Then there are two ways. **Short:** the 8 missions, about 15 minutes each. **Full:** every test case below. Mark each one: OK, Problem or Skipped. Only this browser remembers the marks; on paper, tick by hand.

NO NEED TO DO THEM ALL

This many test cases can look like a lot at first: please don't let that put you off. Nobody expects you to do them all. Even a few are a great help; pick the ones that interest you, or the ones you would use in daily life. One well-described problem is worth more than ten ticked boxes.

0 OK · 0 problem · 0 skipped · of 44

Missions (short way)

1

Install, then explore without the guide; send your first impressions.

S1 S3 F1

2

Your own day: type 5-8 steps of a real morning or evening; change a picture.

P2 P4 P5

3

A real run: go through it once for real, with the screen on.

R2 R3 R6 R7 T1

4

Your own voice: record one step and one praise.

P6 E4

5

Backup: save it, and load it on another device.

B1 B3 B4

6

More plans: make a weekend plan and switch between the two.

P7

7

Record a routine: do it for real and tap at each step.

P8

8

Free try. At the end write: one thing you liked, one that confused you, and whether you'd show it to a family who needs it (yes, maybe, no).

F1

Start and install

S1 First start

STEPS

Open the address. Language. Try **Continue** without the tick, then with it. Name, PIN.

SHOULD HAPPEN

Without the tick: "Please accept the terms to continue." Then the helper area with the example day, a picture on every step.

◯ ◯ **Problem** ◯ **Skipped**

S2 PIN

STEPS

☰ > **Helper PIN**: type 3 digits, then 4. Eye button.

SHOULD HAPPEN

An error for 3 digits. The PIN shows as dots; the eye shows it for 5 seconds.

◯ ◯ **Problem** ◯ **Skipped**

S3 Install

STEPS

As in part 1. Open it with the icon.

SHOULD HAPPEN

Icon on the home screen; opens full screen; the top bar is not under the camera notch. When the app opens, the old browser tab goes quiet: it closes itself, or it says DayRobin is open in the app. Sounds and notifications come only once.

◯ ◯ **Problem** ◯ **Skipped**

S4 Offline

STEPS

Airplane mode on, open the app, start a practice.

SHOULD HAPPEN

It opens and works.

◯ ◯ **Problem** ◯ **Skipped**

S5 Two modes help

STEPS

How do the two modes work?

SHOULD HAPPEN

A clear explanation; **Got it** closes it.

◯ ◯ Problem ◯ Skipped

S6 Close and reopen

STEPS

Close the app fully (swipe it away), restart the phone, open it.

SHOULD HAPPEN

Plan, pictures, recordings and settings are all there.

◯ ◯ Problem ◯ Skipped

Writing the plan

P1 Samples

STEPS

Example day, and ☰ > **Start from a sample**: Morning, Evening, School day, Weekend, Young adult's day.

SHOULD HAPPEN

It asks before replacing. Every step has a picture.

◯ ◯ Problem ◯ Skipped

P2 Own plan

STEPS

Type 5-8 lines like `07:10-07:20 Brush teeth`, then **Make pictures and voice**.

SHOULD HAPPEN

One step per line with a fitting picture. If a picture does not fit: tell us which word.

◯ ◯ Problem ◯ Skipped

P3 Wrong lines

STEPS

Type `Brush teeth` (no time), `25:00-25:10 Something`, `09:00-08:00 Back`, and two overlapping lines.

SHOULD HAPPEN

A clear red message per line; a warning for the overlap.

◯ ◯ Problem ◯ Skipped

P4 Change a picture

STEPS

Tap a step's picture: **Best matches**, search, **Use my own picture** with a photo.

SHOULD HAPPEN

The new picture shows in the row and on the routine screen.

◯ ◯ Problem ◯ Skipped

P5 Spoken text

STEPS

Tap a step row, change the sentences (one per line), **Listen**.

SHOULD HAPPEN

The phone reads it aloud in a clear voice.

◯ ◯ **Problem** ◯ **Skipped**

P6 Own voice for a step

STEPS

Step row > **Record my voice** > speak > **Stop recording** > **Play my voice**. At the end **Delete my voice**.

SHOULD HAPPEN

It asks for the microphone; plays back clearly; the routine plays your voice.

◯ ◯ **Problem** ◯ **Skipped**

P7 More plans

STEPS

+ New plan (empty or a copy), switch by tapping, **Rename**, **Delete this plan**.

SHOULD HAPPEN

Each plan keeps its own steps, pictures and recordings.

◯ ◯ **Problem** ◯ **Skipped**

P8 Record a routine

STEPS

Record a routine > name > **Start recording**. At each step **New step**, if you like **Say the sentence** and **Take a photo**. **Break**, **Finish**, name the steps, **Make the plan**.

SHOULD HAPPEN

A new plan with the real times, sentences and photos. The screen stays on meanwhile.

◯ ◯ **Problem** ◯ **Skipped**

Routine screen

R1 Practice

STEPS

Practice now and **Fast practice (10× speed)**.

SHOULD HAPPEN

Starts from the first step, a **Practice** label on top.

◯ ◯ **Problem** ◯ **Skipped**

R2 Start the routine

STEPS

Start routine > **Ready?** > **Start**.

SHOULD HAPPEN

Big picture, time bar, the voice says the step.

◯ ◯ **Problem** ◯ **Skipped**

R3 Start and finish a step

STEPS

Tap to start, then **Tap when done**.

SHOULD HAPPEN

Praise (voice and a star), then the day view with the next step.

◯ ◯ Problem ◯ Skipped

R4 Reminders

STEPS

Don't tap for 1 minute; let the time run out. Then ☰ > **Gentle reminders** off, and again.

SHOULD HAPPEN

A gentle reminder after 1 minute, 2 minutes before the end, and **Time is up**. Switched off: no reminders.

◯ ◯ Problem ◯ Skipped

R5 Late start

STEPS

Start the routine when 1-2 steps' time has already passed.

SHOULD HAPPEN

A **Late start** question: **from the beginning** or **Skip to ...**

◯ ◯ Problem ◯ Skipped

R6 Screen stays on

STEPS

Leave the routine screen open for 10 minutes without touching it.

SHOULD HAPPEN

The screen does not turn off; steps start on time, with sound.

◯ ◯ Problem ◯ Skipped

R7 Lock

STEPS

A short tap on the lock; then a 2-second press; a wrong PIN, then the right one.

SHOULD HAPPEN

A short tap does nothing. Wrong PIN: "Wrong PIN. Try again." Right PIN: the helper area.

◯ ◯ Problem ◯ Skipped

R8 End of the day

STEPS

Finish every step (fast practice is quickest).

SHOULD HAPPEN

All done for today! and the end-of-day praise.

◯ ◯ Problem ◯ Skipped

R9 Sounds and calm mode

STEPS

☰ > **Sounds** off, **Calm mode** on; practice.

SHOULD HAPPEN

No chimes; less movement on the screen.

◯ ◯ **Problem** ◯ **Skipped**

R10 Fixed time

STEPS

In the helper area open a step (for example the bus) and switch on **Fixed time**. Start the routine and be late with the step before it.

SHOULD HAPPEN

The fixed step comes at its own time. The step before it ends then; steps that no longer fit are **missed**. The day is not pushed further.

◯ ◯ **Problem** ◯ **Skipped**

R11 Coming up (card)

STEPS

In the plan text add a line that starts with **>**, for example **> 2026-12-24 18:00 Grandma comes for lunch** (the time is optional). Also try a wrong or past date. Start the routine and finish the last step. Under ☰ > **Coming up** change the number of days.

SHOULD HAPPEN

A wrong or past date gives a clear message with the line number. The > line is not a step: no time bar, start, star or alarm. After the praise a calm card with a violet frame appears (3 at most, nearest first): “Tomorrow”, the weekday or “in … days”, a picture, the words, the time small, spoken once; one **OK** closes it. The list also shows on the All done screen and in the helper's **Today** panel.

◯ ◯ **Problem** ◯ **Skipped**

R12 How to start (helper card)

STEPS

On a fresh install (or after a clean start) save the first plan with **Make steps**. Later open the **How to start** link at the bottom of the helper area. Also look at it on a small phone.

SHOULD HAPPEN

One short screen appears once: the five stages, “On a hard day, go back one stage”, and a few tips. It fits one screen without scrolling, also in dark mode. **Got it** closes it and it does not come back by itself.

◯ ◯ **Problem** ◯ **Skipped**

Today panel

T1 Fixes for today

STEPS

After a real routine today, open the helper area: **Today**. Try **Not done**, **Do it now**, **Skip today**, **Undo**.

SHOULD HAPPEN

Per step: done (with the time), missed, now, next. A fix counts for today only.

◯ ◯ **Problem** ◯ **Skipped**

Settings

E1 Change language

STEPS

☰ > **Language** > Magyar, then back to English. Look at the routine screen too.

SHOULD HAPPEN

Every label changes, the lock label on the routine screen too.

◯ ◯ **Problem** ◯ **Skipped**

E2 Voice and speed

STEPS

☰ > **Voice**, **Speaking speed**, **Test the voice**.

SHOULD HAPPEN

It speaks; the speed changes. No voice for your language? The app shows how to add one.

◯ ◯ **Problem** ◯ **Skipped**

E3 Phone check

STEPS

☰ > **Phone check** > **Run the phone check**. Tap a ? next to a line that is not OK.

SHOULD HAPPEN

One line each: sound, voice, microphone, installed, plans kept safe, screen, alarms, backup. The ? opens the manual part about the fix. Is what it says about your phone true?

◯ ◯ **Problem** ◯ **Skipped**

E4 Praise in your own voice

STEPS

☰ > **Praise in your own voice**: record 3 praises and **End of the day**.

SHOULD HAPPEN

They play after steps, never the same one twice in a row.

◯ ◯ **Problem** ◯ **Skipped**

E5 Keep the user in the app

STEPS

Follow the text in Settings: Guided Access on iPhone, App pinning on Android.

SHOULD HAPPEN

Nobody can leave the app until you unlock it. Was the text clear?

◯ ◯ **Problem** ◯ **Skipped**

E6 Help: ? and the manual

STEPS

Tap a ? in the helper area and in Settings; at the bottom of the helper area: **User manual**. Try it in airplane mode too.

SHOULD HAPPEN

The manual opens at the matching part, in your language (Hungarian or English). Offline: "The user manual needs the internet." Did what you read there help?

◯ ◯ **Problem** ◯ **Skipped**

Backup

B1 Save a backup

STEPS

As in part 4.

SHOULD HAPPEN

A file on the phone or in Drive; **Last backup** with today's date.

◯ ◯ **Problem** ◯ **Skipped**

B2 With a password

STEPS

Protect with a password, twice. Load with a wrong password, then the right one.

SHOULD HAPPEN

Wrong: "Wrong password, or the file is damaged." Right: it loads.

◯ ◯ **Problem** ◯ **Skipped**

B3 Load

STEPS

Change something, then **Load a backup file**.

SHOULD HAPPEN

It asks first; then "Backup loaded." and the old state.

◯ ◯ **Problem** ◯ **Skipped**

B4 On another device

STEPS

On another phone, tablet or computer, on the first screen: **Load a backup file**. Best on another kind of device: Android to iPhone, iPhone to Android or a computer.

SHOULD HAPPEN

All plans, pictures and recordings are there, and the recordings play. If the device cannot play a recording, it says so after loading, and the device voice reads that step. Tell us which device to which.

◯ ◯ **Problem** ◯ **Skipped**

Feedback

F1 Report by e-mail

STEPS

As in part 6, with a picture.

SHOULD HAPPEN

The mail app opens with the text; the mail goes out with the picture.

◯ ◯ **Problem** ◯ **Skipped**

F2 Tester log

STEPS

Tester mode on, a report with **Add the tester log** ticked; **Save the log to a file**.

SHOULD HAPPEN

"Tester log" lines in the mail; saving gives a file. No typed text in it.

◯ ◯ **Problem** ◯ **Skipped**

F3 Receipt with a ticket

STEPS

Wait after F1.

SHOULD HAPPEN

A mail with a "DR-..." ticket number (part 7).

◯ ◯ **Problem** ◯ **Skipped**

F4 Retest and reply

STEPS

After a "DayRobin update" mail: as in part 8.

SHOULD HAPPEN

The fix works; you don't need to wait for a new receipt for your reply.

◯ ◯ **Problem** ◯ **Skipped**

Update and remove

U1 Update

STEPS

☰ > **Check for a new version**.

SHOULD HAPPEN

"You have the newest version", or a new version and **Restart now**. Plans stay.

◯ ◯ **Problem** ◯ **Skipped**

U2 Erase all data

STEPS

Save first! ☰ > **Erase all data on this device**.

SHOULD HAPPEN

It asks; then the first screen comes.

◯ ◯ **Problem** ◯ **Skipped**

U3 Uninstall and reinstall

STEPS

As in part 9, then load the backup.

SHOULD HAPPEN

The icon is gone; reinstalled, the app is fresh; the backup brings everything back.

◯ ◯ **Problem** ◯ **Skipped**

11

Known limits

We know about these; no need to report them. If one of them really gets in the way of your day, do tell us.

- A closed app sounds its alarms through the Settings switch "Alarms when the app is closed" (tested on Android with the installed app; not yet on an iPhone Home Screen app: tell us what you see). Without the switch, keep the routine screen open.
- The app cannot block the Home button: use Guided Access (iPhone) or App pinning (Android).
- AI drawing and AI sentences are not in this version.
- Samsung's own voice engine has no Hungarian: the app shows how to switch to Google's engine.
- After Install the browser tab cannot switch to the app by itself: open it with the icon. The browser often does not let the tab close itself: then close it in the tab list.
- A step cannot cross midnight. Plans do not switch by weekday by themselves yet.
- The app cannot attach a screenshot: attach it by hand in the mail app (part 6).
- Hungarian and English were written with care; the other 20 languages are machine translations.

12

Privacy and good habits

- Don't write full names, illnesses or diagnoses in a note.
- Crop names and notifications out of screenshots.
- Before sending, delete the signature and phone number at the bottom of the mail.
- Don't send passwords or personal data.

- What we keep: your e-mail address, a short summary and your text, in the project's own private list. No names, phone numbers or signatures.
- This is a test version. For important things (like medicine times) keep your usual way too.
- You can stop any time. Every note helps, "all fine" too.
